15th Annual New York & New Jersey Pain Medicine Congress

Evolving Advanced Pain Therapies

November 5-8, 2026 • The Hyatt Regency Jersey City, New Jersey

Message from our Chairman and Course Directors

Dear Colleagues,

On behalf of the Founder and Chairman, Sudhir Diwan, MD, and Vice Chairs Scott Woska, MD, Christopher Gharibo, MD, Kenneth Chapman, MD, Edward Rubin, MD, and Course Directors Andrew Kaufman, MD, Sandeep Rathi, MD, Hemant Kalia, MD, Casey Grillo, NP and the New York and New Jersey Societies of Interventional Pain Physicians (NYSIPP & NJSIPP), we would like to invite you to join us at the New York and New Jersey Pain Medicine Congress 2026: Evolving Advanced Pain Therapies. This year's meeting is held November 5-8, 2026, at the Hyatt Regency Jersey City, New Jersey.

The NYSIPP & NJSIPP Pain Medicine Symposium was established in 2011 with the primary objectives of educating healthcare professionals to promote the development of safe, high-quality, and cost-effective practices in interventional pain management techniques for the diagnosis and treatment of pain and related disorders, and to ensure patient access to these interventions.

Our scientific program will provide cutting-edge information on advanced state-of-the-art pain management techniques, advanced regenerative medicine therapies, advanced neuromodulation therapies and beyond, vertebral augmentation, discography, and intradiscal procedures, radiofrequency, peripheral nerve stimulation, intrathecal therapy, minimally invasive sacroiliac fusion and for lumbar spinal stenosis. This congress will offer a half-day hands-on cadaver, ultrasound, and regenerative medicine workshop, incorporating didactic lectures with hands-on practice for improved technique and patient outcomes for interventional procedures presented by nationally and internationally renowned experts. Additionally, we have focused pre-congress courses for residents and fellows, as well as for advanced practice providers.

Industry Partners and technical exhibits are an important part of our meeting's success and benefit both the attendees and the companies that choose to participate. We anticipate that an excess of 600 clinical providers specializing in pain management, interventional pain management, and neurosurgery will attend, including physicians, mid-level practitioners, fellows, residents, nurses, and pharmacists.

We look forward to seeing you at the 15th Annual of the New York and New Jersey Pain Medicine Congress in November 2026!

Program Needs Assessment

Interventional Pain management incorporates interventional treatment options for patients to reduce or eliminate the need for chronic conventional medication management (and/or opiate therapy). Interventional treatment options include: spinal cord stimulation, peripheral nerve stimulation, vertebral augmentation, radiofrequency nerve ablation, etc. Since Interventional Pain Management is such a juvenile specialty, very few pain management physicians and anesthesiologists have gone through specific interventional fellowships and residencies. Training in the proper patient selection and utilization of these therapies is limited. Interventionalists need to attend and participate in training programs to receive education and skill based training in options available for patients.

Additionally, new guidelines are emerging.

It is important for the experts in the field to share the most current information and data available to assist physicians in selecting the right patients and right therapies to improve patient outcomes. Vital topics to be discussed are: New Innovations, Establishing Protocols, Neuromodulation, Complicated Cases, Intrathecal Drug Delivery, Conflicting Evidence and Research.

At the conclusion of this meeting, attendees will develop rational guidelines to assist in improving access to care and treatment outcomes for chronic pain patients.

Learning Objectives

- Compare the new and established techniques in interventional pain management to benefit their patients living with chronic or acute pain syndromes
- Discuss emerging trends and share the newest available data to increase the level of their state-of-the-art medical services
- Determine gaps in education and provide updated information and data to improve patient outcomes
- Present the latest in evidence based medicine to support physicians in selecting the right patients for therapies
- Provide a format for information sharing and feedback
- Review the appropriate utilization of screening options and patient selection to identify those patients at significant risk of developing addictions to controlled substance or those that may abuse, misuse or divert medications prescribed for chronic pain
